PROFILE

AI & ML Enthusiast and results-driven Software Engineer with a strong foundation in JavaScript, React, React Native, and Node.js, and hands-on experience developing scalable web and mobile applications. Demonstrated expertise in building modern UI/UX interfaces using React.js, Tailwind CSS, and Expo, along with backend integration using Node.js and MySQL. Passionate about AI-driven applications, digital marketing, and creative problem-solving, with a focus on building efficient and user-centric solutions.

TECHNICAL SKILLS

- Python, JavaScript, Node.js MySQL
- Tailwind CSS, UI/UX, Figma.
- ReactJS, React Native, Expo, Tailwind CSS
- AI Frameworks – TensorFlow, Py Torch, Scikit-learn, OpenCV
- Machine Learning – Supervised & Unsupervised Learning, Model Optimization
- Git, Git Hub, N8N Automation

EXPERIENCE

ASSOCIATE SOFTWARE DEVELOPER

Artihcus Global Private Limited, Hyderabad

June 2025 – February 2026

- Promoted to full-time Software Engineer following successful completion of internship, recognized for strong technical contribution.
- Developed a scalable internal documentation tool-Artifact, using React for a dynamic front end and Node.js for a robust back end. Integrated with firebase for efficient data management and seamless information retrieval Built Artifact, an internal documentation management tool with real-time data access, enhancing knowledge sharing and team collaboration.
- Collaborated with design and backend teams to implement scalable, secure, and maintainable systems in production.
- Integrated machine learning modules for internal tools, demonstrating a proactive approach to combining AI with business systems.
- Developing packaging application which includes all the packaging details and their places and space optimization.

INTERN (Artihcus Global)

Oct 2024 – June 2025

- Revamped and engineered the company's official website, implementing a scalable and high-performance architecture using React and Firebase as the database.
- Warehouse Management Integrated with Ai
- Learnt SAP Basics
- Represented Artihcus Ai Solutions at Expo's

PROJECTS

Vehicle License Plate Recognition*(Academic Project)*

This is Based on Machine Learning.

It is used to detect and track the object of interest (i.e The Car) in video frames. Which is motivated by the high difficulty of detecting vehicle in images captured from a moving platform.

The Powder Legacy – E-commerce Website *(fullstack)*

<https://www.thepowderlegacy.in/>

Developed a fully responsive e-commerce website for a home grown organic powders selling brand using React.js, Tailwind CSS, and Supabase Implemented smooth animations and interactive UI components to enhance user engagement.

Integrated with Ecwid for post order management.

Integrated with Razor pay for payments and for analytics and CMS separate admin dashboard.

Skull Engine Studio - Website *(frontend & backend)* <https://www.skullenginestudio.in/>

Built a full-featured services website using react js.

Skull engine studio is used to provide various services it is mainly based on the marketing and animation services.

Developed With a different section theme concept to feel that service vibe when you are in that section .

Integrated with Email js.

Gold Center – Web App <https://goldrush-one.vercel.app/>

Developed a webapp for a gold shop to maintain the gold rates and the staff of the shop easily.

SMDB developed using React js and firebase.

Used math for calculating and local gold cash to update in local and all the logics for custom gold making process and billing feature.

Integrated with Whatsapp to send automatic text to customer.

Daily Tools – Web Services *(frontend & backend)* <https://dailytools1.vercel.app/>

Daily Tools is Web services based application provides a wide range of online tools at one place to save time .

Backend developed using Ai models and Python Scripts to run the endpoints and deployed in Railway.

Frontend Deployed in Vercel.

Image Background Remover I have used the trained mistral model

Farm Cart - Mobile Application*(Frontend)* <https://github.com/geethasandesh/farmcart>

Developed a Farm Cart application like big basket it acts like mediator between farmer and users where they can directly contact and buy from farmers for organic vegetables and fruits.

Developed using React Native, Expo Go and Firebase

Sangeeth – Music App *(Expo Go)* <https://github.com/geethasandesh/sangeeth>

This application developed using React Native, Expo Go and Firebase

It is developed for my personal purpose instead of paying for music apps I need to make it my own for my playlist songs.

We need to download the songs form any online platform and upload it in firebase or from admin side .

EDUCATION

B-Tech in Computer Science (AI & ML Specialization)	Sep 2021 - June 2025
Malla Reddy University - 85%	Hyderabad , Telangana
Higher Secondary Education	2020 - 2021
RJC Junior College - 84%	Khammam, Telangana

ADDITIONAL INFORMATION .

Represented Arthicus Global at the **National AI Summit** organized by **HYSEA** on Feb 11, 2025, at Novotel, Hyderabad.

HOBBIES & INTERESTS

Creative content creation through video editing, photography, and storytelling - blending visuals and technology to build engaging digital experiences.
